

GA SERIES

ULTRA PERFORMANCE CNC TURNING CENTERS

THE ULTIMATE MACHINING POWER
WOODWAY

ULTRA PERFORMANCE TURNING CENTERS

Engineered to handle heavy-duty turning applications with superb accuracy, the GA series ultra performance turning centers combine extremely powerful high torque motors, super rigid box way constructions, and large diameter servo indexing turrets to bring you The Ultimate Machining Power®. The GA series will help you be more competitive by achieving faster cycle times with heavier cuts, faster machine movements, and allow cutting of tough material efficiently. You'll also appreciate the reliability and durability that our machines are known for. Plus, with more standard features than any other machine on the market today, many say it's the best investment they have ever made.

- ▶ Extremely powerful high-torque spindles deliver 2.5 ~ 4 times the torque output of standard spindles.
- ▶ Extra large Z-axis servo motors provide the thrust needed to efficiently drill big diameter holes.
- ▶ In order to endure the machine's high outputs with durability, heavy-duty roller bearings are used to support the spindles and axes guide ways are of super-rigid one-piece box ways.
- ▶ The modern 30° slant wedge bed design provides smooth chip disposal and easier operator access without sacrificing machine rigidity.

/300 : Compact Bed /900 & L : Long Bed M : Live Tooling & C-axis

*1 Turning length listed here are approximate numbers, individual models may vary. Please see machine specifications page for details.

GA series machines (excluding compact bed GA-2000/300 model) feature a standard programmable base and quill tailstock.

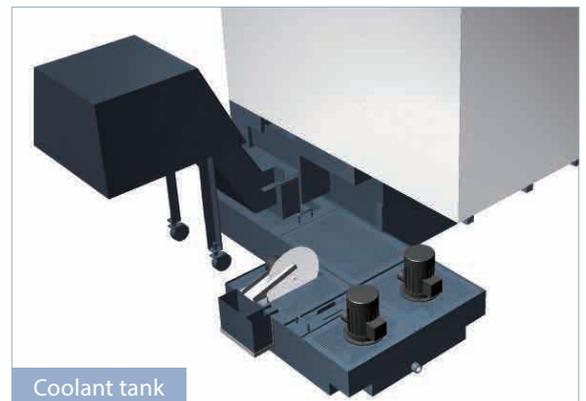

- ▶ Manual mode quill-jog function allows the quill to be inched forward, which makes it easier to insert the center into the center hole.
- ▶ Movement of the base and quill in auto mode are controlled by M-codes and thrust pressure is manually adjustable.
- ▶ Z-axis carriage automatically locks onto the tailstock base and moves it to the desired position with precision accuracy.

Tailstock shown with optional live center

Machine rigidity is increased by eliminating the opening required for under-machine-type coolant tanks.

- ▶ Utilizing unused space, this larger 145 L coolant tank placement allows optimal air circulation for faster heat dispersion and lower coolant temperature, which will help extend coolant life.
- ▶ Heat escapes directly into the air, not trapped inside the machine; this tremendously improves the machine's overall accuracy by lowering thermal expansion effects to a minimum.
- ▶ Coolant tank allows the connection of compressed air to circulate coolant and keep it fresh when machine is not in use.

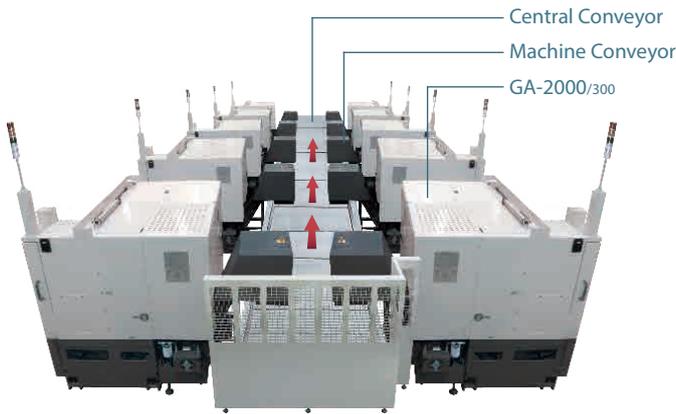

Coolant tank

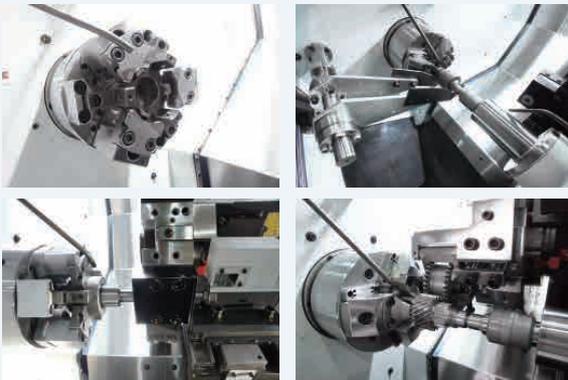

(GA-3300L model shown.)

GA-2000/300 COMPACT DESIGN SERIES

- ▶ By using the same high rigidity design, GA-2000/300 series only needs 3.3 m² floor space which makes much more flexible for space usage.
- ▶ Back-exit conveyor design is suitable for central conveyor gathering arrangement which can efficiently lower manpower.

(GA-2000/300 model shown.)

Customized Equipment

Integrated the characteristics of GA-2000/300 and great engineering, GOODWAY is capable to develop all sort of specialized and customized equipment for customers. GOODWAY is selected by well-known automobile corporations.

Robot Arm

Featured robotic arm, loading and unloading can be done in one setup which is pretty safe and quick to fulfill needs of mass production.

(Robotic arm)

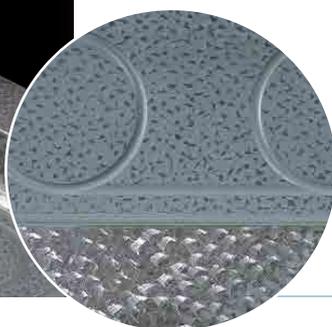

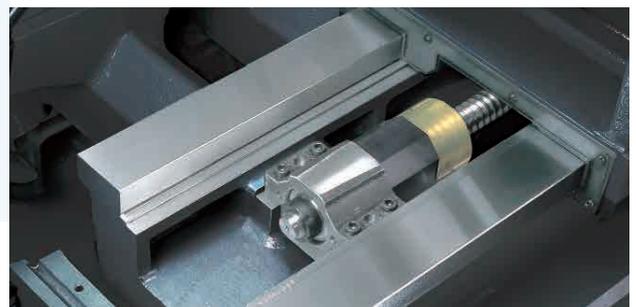

(Gantry type robotic arm)

HIGH RIGIDITY STRUCTURE

- ▶ By using Finite Element Methods (FEM), optimal reinforce ribbings are directly cast into the one-piece bed structure. Mechanical rigidity has been increased by more than 30% when compared to conventional designs.
- ▶ Built to withstand years and years of rigorous high production turning, the heavily ribbed, one-piece thermally balanced bed and casting components are of " MEEHANITE " casting.
- ▶ X and Z axes are driven by over-sized FANUC AC α i series absolute servo motors, providing tremendous thrust outputs with faster acceleration and deceleration. Absolute encoder technology eliminates the use of limit switches, thus, eliminating referencing axes to home positions and broken limit switches.

- ▶ Extra wide, hardened and precision ground box ways are widely space, and directly cast on to the machine bed and saddle for maximum strength and precision. The box way design also provides the rigidity needed for heavy-duty and interrupted turning applications.
- ▶ C3 class hardened and precision ground ball screws ensure the highest accuracy and durability possible. Plus, pretension on all axes minimizes thermal distortion.
- ▶ Slide ways are bonded with " Turcite B " to eliminate stick-slip, minimize wear and maintain long term accuracy. Rapids are 20 m/min. on X-axis & 24 m/min. on Z-axis.

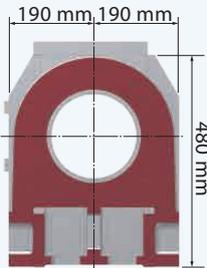

Contact surfaces of all slides, headstock, turret, tailstock, and ball screw bearing housings with the machine bed are hand scraped to provide maximum assembly precision, structural rigidity, and load distribution.

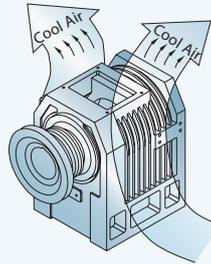

ULTIMATE TURNING POWER

- ▶ P4 grade (Class 7) super-high precision bearings are directly assembled for maximum level of support and precision. Bearing configuration is designed for super heavy-duty cutting with ultra-smooth performance and long term durability with a higher level of accuracy.
- ▶ The optional 2-step gear box provides maximum torque up to 1,040 Nm (GA-3600), which can easily meet with heavy cutting requirements.

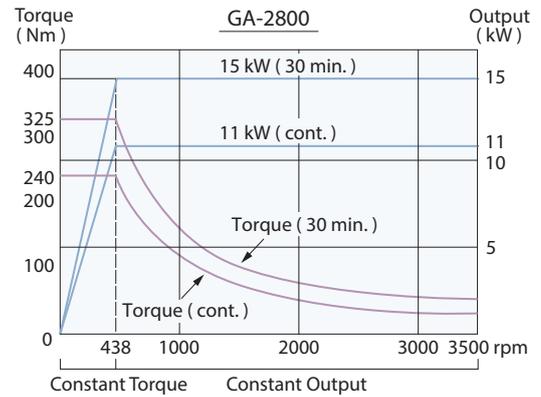

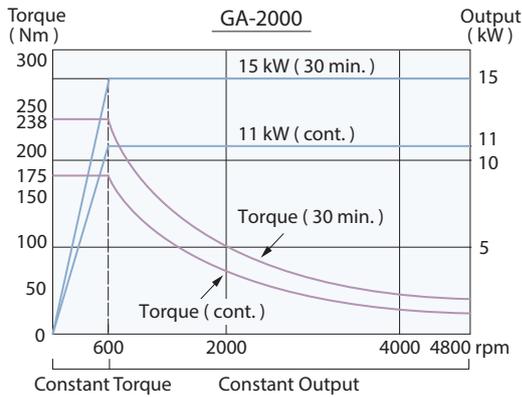

Head stocks feature even thickness sides, which evenly distribute cutting forces to the machine bed, resulting in exceptional vibration dampening characteristics and forms a stronger structure to handle interrupted and heavy cutting applications.

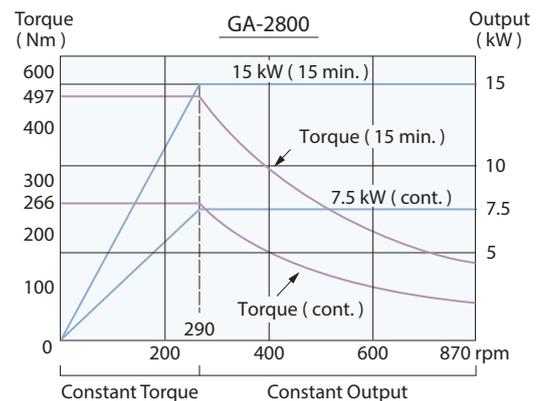

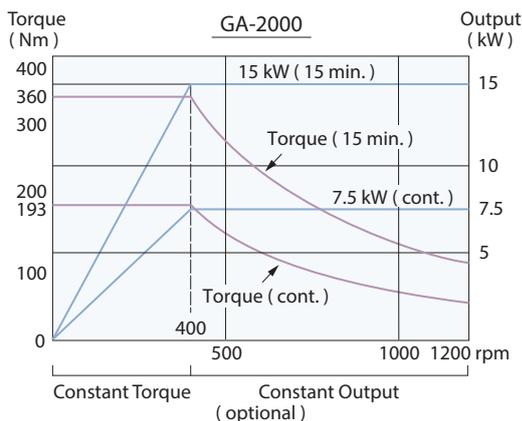

Heat dispending fins around the headstock evenly dispense heat to reduce deformation, therefore, increasing machining accuracy.

ADVANCED TURRET TECHNOLOGY

GA-2000 Series

- ▶ The heavy-duty servo indexing turret achieves 0.2 second indexing times for adjacent stations and 0.5 second for stations at the opposite end of the disk. Index movements are single step, without pauses, no matter how many stations are skipped.
- ▶ \varnothing 230 mm diameter super high precision curvic couplings accurately position the turret disk and 4,700 kg of clamping force ensures abundant turret rigidity for all cutting conditions.

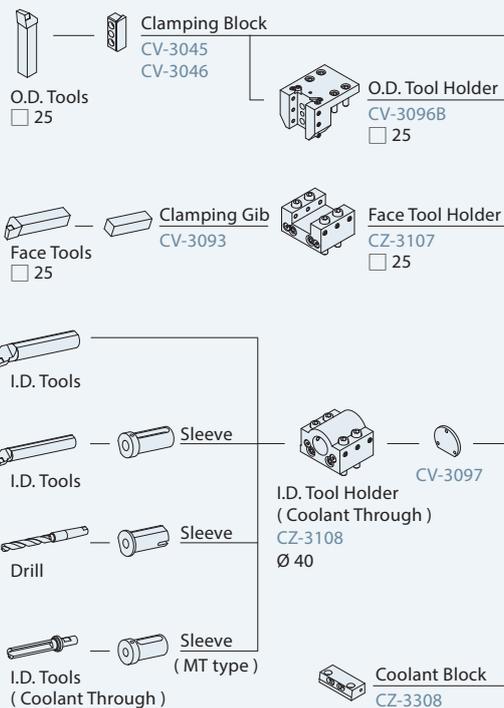

- ▶ The standard 12-station turret clears 8" diameter work holding devices without interference, even when loaded with tooling at maximum shank size. The optional 10-station turret clears 10" diameter work holding devices without interference, even when loaded with tooling at maximum shank size.

LIVE TOOLING TURRETS

- ▶ Live tooling capabilities on the GA series allows a work-piece to be turned, milled, drilled and tapped without moving it to another machine.
- ▶ The 12-station GOODWAY live tooling turret offers 12 stations available for live tooling (live tooling tools rotate in working position only) and features a non-lifting turret disk.
- ▶ GOODWAY's live tooling turret utilizes the latest servo indexing technology to achieve 0.2 second indexing times for adjacent stations and 0.5 second for stations at the opposite end of the disk.
- ▶ With the latest technology, live tooling is driven by an AC servo motor to provide ample power, in the form of torque. Now, even the toughest of jobs may be tackled without a sweat.

ULTIMATE C-AXIS SPINDLE

- ▶ With the FANUC servo motor generating an ultra high resolution of 33,000,000 pulses per spindle rotation and 480 Nm of torque, surface finishes are much superior than Cs-axis (driven by spindle motor) equipped machines. Plus, dynamic accuracy is within $\pm 0.02^\circ$ even under heavy cutting loads.

- ▶ The Cf-axis and disk brake system available on the GA series provides the most rigid and powerful type of C-axis on the market today. In Cf-axis mode, a servo motor is engaged and drives the rotation of the spindle, engagement time is less than 2 seconds.
- ▶ Working with the live tooling turret, the Cf-axis and disk brake system enables the machine to perform drilling, tapping, and milling operations, including cylindrical and polar coordinate interpolations (resembling a 4th-axis rotary table on a machining center).

LIVE TOOLING & SPECIAL TOOL HOLDERS

0° Live Tool Holder

O.D. drill & mill holder

- ER 32 collet

O.D. mill holder with combination mill arbor similar to DIN 6358

High speed O.D. drill & mill holder

- ER 20 collet
- Max. 8,000 rpm, ratio $i = 1 : 2$

90° Live Tool Holder

Face drill & mill holder

- ER 32 collet

Dual-side face drill & mill holder

- ER 32 collet

High speed face drill & mill holder

- ER 32 collet
- Max. 8,000 rpm, ratio $i = 1 : 2$

Dual-Face Turning Holder

GOODWAY dual-face turning holder allow both sides of a disk-type work-piece to be machined at the same time. Tool holder automatically spreads open for retracting tooling to avoid damage to the turned surfaces.

Simultaneous dual-face turning of disk brake

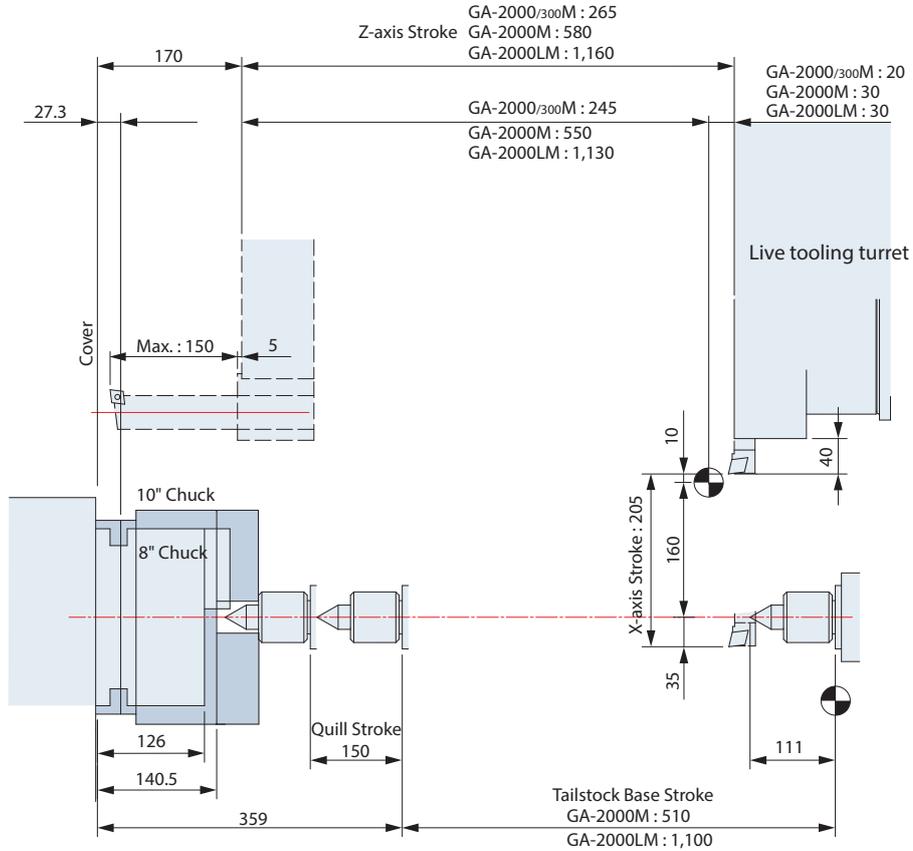

Fine adjustment of turning thickness

- ▶ Machining time is reduced by over 50%.
- ▶ Excellent surface quality by using a viper geometry ground insert.
- ▶ The angle of blades have been adjusted precisely to obtain the optimal surface accuracy of work-piece.
- ▶ Reduced vibration & increase parallelism accuracy utilizing symmetrical cutting pressure.

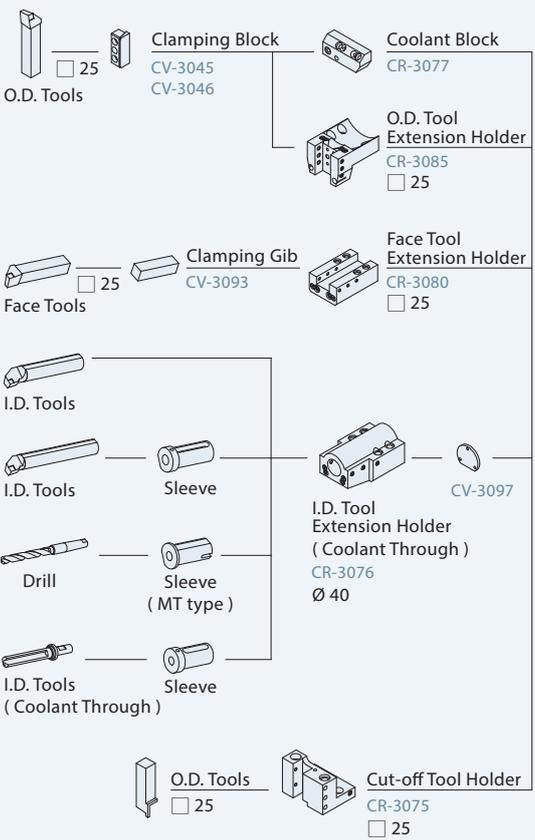

- ▶ Activating the live tool holder can be done by slightly adjust scale ring, in order to quickly and precisely adjust the thickness of cutting.
- ▶ Setups are easy with the integration of both hydraulic and spring activation.

STANDARD & OPTIONAL FEATURES

Chip Conveyor

The standard chip conveyor features adjustable timers that allow the operator to set operation intervals according to the amount of chips generated by the machine. Thus, reducing coolant loss to a minimum.

S : Standard O : Option - : Not Available

Tool Setter (Opt.)

The optional RENISHAW HPM tool setter utilizes a motorized arm to lower the tool probe into position. An auto tool check function further increases tool touch off efficiency. (HPR removeable-arm type tool setter on GA-3600 / L series)

Load Monitoring (Opt.)

The load monitoring function is used to detect abnormal load of tools by monitoring the variation in spindle motor and servo motor loads during the cutting process. When abnormal loads are detected, the machine will stop at program end (M30) or immediately (feed hold status) according to tool life value or tool break value respectively.

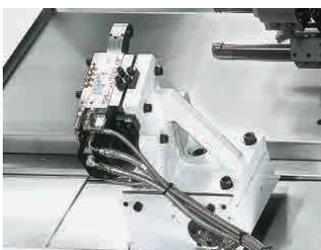

Parts Catcher (Opt.)

Optional hydraulic parts catchers can be programmed to catch finished parts after cut-off.

Bar Feeder (Opt.)

Optional bar feeding systems feed bars up to Ø 65 mm diameter.

Automatic Steady Rest (Opt.)

Parts Conveyor (Opt.)

4-Jaw Chuck (Opt.)

Air Chuck (Opt.)

Spindle drive ratio		7 : 10	35 : 54
Spindle speed range		30 ~ 3,000 rpm	25 ~ 2,500 rpm
Spindle full output speed		403 rpm	373 rpm
Spindle torque (30 min.)		522 Nm	385 lb-ft
Spindle torque (peak)		439 Nm	323 lb-ft
		473 Nm	348.8 lb-ft
GEAR BOX SPINDLE (Opt.)			
Spindle speed ranges	L	30 ~ 1,050 rpm	30 ~ 1,000 rpm
	H	1,050 ~ 3,000 rpm	1,000 ~ 2,500 rpm
Spindle full output speed	L	263 rpm	239 rpm
	H	1,050 rpm	955 rpm
Spindle torque (15 min.)	L	946 Nm	697 lb-ft
Spindle torque (30 min.)	H	237 Nm	174 lb-ft
		260 Nm	191 lb-ft
Cf-AXIS SPINDLE (Opt.)			
Drive type		AC Servo Motor 1.0 kW	
Torque output / Max. speed		480 Nm	
		354 lb-ft / 33 rpm	
X & Z AXES			
Max. X-axis travel*3		260 mm	
		10.24"	
Max. Z-axis travel*4		630 / 930 / 1,230 mm	
		24.8" / 36.61" / 48.43"	
X / Z axes rapids		20 / 24 m/min.	
		788 / 945 IPM	
Slide way type		Hardened & Ground Box Ways	
Feed rates		1 ~ 4,800 mm/min.	
		1 ~ 189 IPM	
X-axis servo motor		AC 2.7 kW	
		3.6 HP	
Z-axis servo motor		AC 4.5 kW	
		6 HP	
X-axis ball screw Ø / pitch		Ø 36 mm / 8 mm	
		1.42" / 0.31"	
Z-axis ball screw Ø / pitch		Ø 45 mm / 10 mm	
		1.77" / 0.39"	
X / Z axes thrust (cont.)		962 kg / 1,411 kg	
		2,121 lb / 3,111 lb	

*4 GA-3300 / GA-3300/900 / GA-3300L

MACHINE SPECIFICATIONS

■ : Metric ■ : Inch

TURRET	GA-2000	GA-2800
Stations	12 Std. / 10 Opt.	
Indexing drive	AC Servo motor	
Indexing speed	0.2 sec. Adjacent / 0.5 sec. 180 degrees (Single step)	
Accuracy	Positioning: ± 0.00069°, Repeatability: ± 0.00027°	
O.D. tool shank size	□ 25 mm 1"	
I.D. tool shank size	Ø 40 mm 1-1/2"	
LIVE TOOLING TURRET (Opt.)		
Stations	12	
Live tooling stations	12	
Live tooling drive type	4.5 kW 6 HP , 22 Nm 16.2 lb-ft (Intermittent) AC Servo motor	
Indexing drive type	AC Servo motor	
Index speed	0.2 sec. Adjacent / 0.5 sec. 180 degrees (Single step)	
O.D. tool shank size	□ 25 mm 1"	
I.D. tool shank size	Ø 40 mm 1-1/2"	
Live tooling shank size	ER 32	
Live tooling RPM range	40 ~ 4,000 rpm	
TAILSTOCK		
Quill center taper	MT#4 (Live Center)	
Quill diameter / travel	Ø 70 mm / 150 mm 2.75" / 5.9"	
Tailstock base travel*1	Fixed / 550 mm / 1,140 mm 21.65" / 44.88"	
Programmable quill / base	Yes / Yes (Not available on GA-2000/300 series)	
Programmable base type	Positioned by Z-axis carriage	
PARTS CATCHER (Opt.)		
Max. part diameter	Ø 77 mm 3"	
Max. part length	150 mm 5.9"	
GENERAL		
Positioning accuracy	0.01 mm 0.00039"	
Repeatability	± 0.003 mm ± 0.00012"	
Standard CNC control	FANUC Oi-TF Plus	
Voltage / Power requirement	AC 200 / 220 +10% to -15% 3 phase / 26 kVA	
Hydraulic tank capacity	30 / 40 / 40 L 7.9 / 10.5 / 10.5 gal	
Coolant tank capacity	145 L (GA-2000/300 : 100 L) 38.3 gal (26.4 gal)	
Coolant pump	3 bar rated at 42.6 PSI	
Machine weight*1	3,500 / 4,000 / 4,600 kg 7,717 / 8,820 / 10,143 lb	
Dimensions L × W × H*1	2,014 × 1,630 × 1,725 / 2,445 × 1,630 × 1,890 / 3,345 × 1,630 × 1,845 mm 79" × 64" × 68" / 96" × 64" × 74" / 132" × 64" × 73"	
Dimensions L × W × H*1 (machine w/chip conveyor)	2,014 × 2,360 × 1,725 / 3,429 × 1,630 × 1,890 / 4,112 × 1,630 × 1,845 mm 79" × 93" × 68" / 135" × 64" × 74" / 161" × 64" × 73"	

Specifications are subject to change without notice.
